East Chicago Recommendation-Sequential Sampling for Lead in Water.docx

Hi Tim,

See attached draft. Since this is a modified version of the sampling we are conducting in Flint, I am sharing it with others as a draft for comment, but I think this should give you a sense for the scope of the effort. Since EPA labs are doing all of the Flint analyses I don't have cost info on that, but I spoke to Val and she is going to try to work on that. However, we need to know if the contractor would be collecting the samples or not to determine overall cost/sample.

Everyone - Any feedback on the customized process for East Chicago would be appreciated.

Subject: Tap Water Testing and Filter Placement

Hi Miguel: Could you send me your write up on the tap water sampling procedure we should use as a part of our soil excavation program at the USS Lead Site? Could you also send me cost estimates for the sampling per property and the cost and type of filter we would be installing?

Thanks,

-Tim
